### AGENDA

1. SRP Consideration of Clarifications to the Air Resources Board (ARB)/Office of Environmental Health Hazard Assessment (OEHHA) August 1993 Report "SRP Version, Proposed Identification of Inorganic Lead as a Toxic Air Contaminant."
2. Discussion of Future Meeting Dates.

### INFORMATION

The SRP is charged with evaluating the risk assessments of substances identified and proposed for identification as toxic air contaminants by the Air Resources Board (ARB) and the Department of Pesticide Regulation (DPR). In carrying out this responsibility, the SRP reviews the exposure and health assessment reports and underlying scientific data upon which the reports are based. These reports are prepared by the staffs of the ARB, DPR, and Office of Environmental Health Hazard Assessment pursuant to sections 39660 and 39661 of the Health and Safety Code and sections 14022 and 14023 of the Food and Agricultural Code. These reports are prepared for the purpose of determining whether a substance or pesticide should be identified as a toxic air contaminant. Written comments or submissions from the public regarding a report should be submitted to the ARB pursuant to the procedure specified in the letter which accompanies the report. Such submissions are reviewed and considered by the SRP. The SRP does not accept written or oral comments from the public at its meetings. For further information on the meeting or how to submit comments, please contact:
